District Energy Sponsors Millard Fillmore Dinner

St. Paul, Minnesota – District Energy St. Paul was the 2008 presenting sponsor of the 14th Annual Millard Fillmore Dinner hosted by the Saint Paul Riverfront Corporation at Saint Paul RiverCentre on May 8, 2008.

An event highlight was the presentation of the first Community Energy Visionary Award to former Mayor George Latimer by John Taylor, board chair of District Energy’s affiliate, Ever-Green Energy. “I am honored to present this award to George Latimer, who not only introduced the hot water district heating concept to Saint Paul building owners, but had the courage and perseverance to see the project through to successful completion,” said Taylor. “Today Saint Paul is recognized as one of the greenest, most livable cities in the nation thanks in part to George’s foresight and determination to find a reliable, efficient, affordable and sustainable way to heat downtown buildings.”

In recognition of its 25th anniversary this year, District Energy purchased 25 live evergreen trees to serve as a décor element at the community event that annually attracts about 1200 people. Following the Dinner, District Energy donated all of the evergreen trees to the City of Saint Paul’s new Trees Saint Paul program for planting May 9 at the newly expanded Jimmy Lee Recreation Center & Great River Water Park.

District Energy’s 25th anniversary gift to the City reflects District Energy’s commitment to using a renewable resource—clean, urban wood waste—to heat and cool downtown Saint Paul buildings.

About District Energy St. Paul

District Energy St. Paul heats about 80 percent and cools about 60 percent of the commercial, residential, industrial and large institutional buildings in downtown Saint Paul and adjacent areas. Its primary fuel is a renewable, local resource: clean, urban wood waste. The company is committed to energy conservation and environmental stewardship.
